

RAIL SAFETY

5 simple tips to help you #CrossSAFE

- **PUT AWAY DEVICES**

Don't let your headphones, cell, tablet or other gadget distract you from seeing or hearing a train.

- **OBEY RAIL SIGNALS & LIGHTS**

Mind the signals - even if you can't see a train yet. Today's trains are faster and quieter than ever before.

- **NEVER TRY TO OUTFRUN A TRAIN**

Whether walking, cycling or driving, never try to beat the train. Wait until the signals indicate it's safe to cross.

- **DON'T TRESPASS**

Stay off rail tracks, and out of railway yards and tunnels. Trespassing can result in a fine, injury or death.

- **BE SELFIE SMART**

Tempted to take a cool pic or selfie? Not on rail property. Take it at a safe distance, or not at all.
